No. G. 131.

Station Ootacamund, *Dated the* 11th April 192 1

From (Name) Major J.J. Cameron, I.M.S.,
(Designation) Inspector-General of Prisons.

To The Secretary to the Government of Madras,
L A W Department

Sir,

With reference to G.O.No. 680, Educn (Education) dated the 6th June 1920, I have the honour to submit for the administrative approval of Government, plans and estimate, the latter amounting to Rs.7,180/- for providing a suitable water supply to the Subsidiary Jail and to the Government Higher Elementary Training School for Masters, Bangalore.

2. The necessity for the work has been fully explained in the report that accompanies the estimate.

3. From the concluding portion of the report, it will be observed that any fluctuation in price will be amply

covered by the contingencies provided for in the estimate.

4. Of Rs.7,180/- a sum of Rs.4,753/- is to be debited to the Jail Department.

5. As the work has been delayed for some time owing to lack of funds and great inconvenience is being experienced for want of water, it is requested that it may be sanctioned for execution during the current year.

I have the honour to be,

Sir,

Your most obedient servant,

Major, I. M. S.,
Inspector-General of Prisons.

Ok.

3-6-1921

Gentlemen,

In your letter W.S. No.4776 dated 3-2-1919 to the Sub Divisional Officer, South Kanara, Mangalore, you have quoted Rs. ~~3,000~~ 2,950 for a tank 10' x 10' x 5' made from 3/16" mild steel plates to hold 3,000 gallons capacity. I ~~have the~~ honour to request whether the quotation of Rs. ~~3,000~~ 2950/- still holds good. An early reply is requested.

I have etc.,

Public Works Department.

Note by the Chief Engineer P.W.D.

No. 13204-2 dated 4.7.24

In May 1920 the Director of Public Instruction submitted for sanction plans and an estimate for providing water supply to the subsidiary jail and to the Government High Elementary Training School for Masters at Mangalore. As it was not possible to provide funds for the work then, the plans and estimate were returned to the Director of Public Instruction with C.C.No. 680-A Mis. dated 8th June 1920 with the request that they may be resubmitted after revision, next financial year. The Inspector General of Prisons has now resubmitted plans and an estimate amounting to Rs.7180.

2. The scheme proposed is to pump water from well No.4 by means of a double barrelled pump into an elevated mild steel tank placed on a masonry tower constructed at 30 feet from the well and the water from the tank is proposed to be distributed both to the jail and the school by means of pipes.

3. The plans and the estimate have been scrutinised in the Chief Engineer's office and the points requiring remarks are dealt with below:-

(a) It is suggested that on the pump rods metal cups with taps for retaining excess oil should be fixed, which should be periodically emptied.

(b) In plan C.P. No.640, a platform is provided on the top of well but no provision has been made in the estimate for the purpose. A lump sum of Rs100 has now been added for providing

providing a light wooden platform with openings for ventilating the well for inspection purposes.

(c) It would be better to raise the level of the floor of the pump chamber to a height of 4½ feet above the ground level, and to provide in this height two expanded metal ventilators say 18" x 9", and also a door to provide access to the cups on the pump rods.

(d) The width of 3 feet for pillar proposed for the masonry tower is not sufficient and has been increased to 3'-6" and the width of foundation also increased to 4' 3" as shown in green on plan W.C. No.224 of 1919.

(e) The section of W.R. rails supporting the tank is insufficient and rolled steel girders of section 7" x 4" x 16 lbs. have been proposed instead.

(f) The thickness of 3/16" mild steel plates proposed for the tank is insufficient and should be increased to 5/16". The tank should be carefully watched for rust and painted annually

(g) As the unsupported length of corrugated iron roofing exceeds 5'6" purlines 4" x 5" should be provided, supported by principal rafters of section 4" x 4" as shown in plan.

(h) The section of bressummer, as proposed viz. 4" x 6" is unnecessarily strong and has been reduced to 3" x 6"

(i) No provision has been made in the estimate for coating the pipes to be relaid with some approved solution to prevent corrosion. A lump sum of Rs.60 has been added to the estimate for the purpose.

6

(j) It is suggested that the pipe line from X to E and from R to Jailor's quarters which are proposed to be retained may also be removed/cleaned and relaid after coating with some solution.

(k) The lump sum, aggregating Rs.75, allowed for contingencies in the estimates for pipe arrangements does not appear to be sufficient to cover possible fluctuations in price of pipes. A lump sum aggregating Rs.500 has now been added to the estimate to cover the increase in the cost of pipes and other works referred to ~~xxxxxxxxx~~ above.

4. With the foregoing remarks the estimate as altered in the Chief Engineer's office amounting to Rs.7930 is recommended for sanction.

Law (Gen'l) Dept.

D.G. offices

C. 2024/A; from the Board, G. 131, 11 4/21

Administrative approval may be accorded to the estimate amounting to Rs 7,180 and the case passed on to P. W. D. w/o through Law (General Parts) for further action. With ref. to Govt. No. 680 Edn., dt 8. 6. 20, it seems that the estimate has not undergone any revision, there being presumably no need for it.
